## SYMBOLISM

A few days before India became independent on August 1947, the specially constituted Constituent Assembly decided that the flag of India must be acceptable to all parties and communities. A flag with three colours Saffron, White and Green, with the Ashoka Chakra, was Selected. Dr. Sarvepalli Radha Krishna, who later became India's first Vice President, clarified the adopted flag and its significance as Bhagwa (or) the Saffron colour that denotes renunciation (or) sacrifice. The white in the centre is light, the path of truth, to guide our conduct. The green shows our relation to the soil. The "Ashoka Chakra" in the center of the white is the wheel of the law of Dharma. The wheel denotes motion. There is life in movement. A widely held unofficial interpretation is that the Saffron stands for purity and spirituality, white for peace and truth, green for fertility and prosperity and the wheel for justice.

## MOON'S ORIGIN

About the Moon's origin, one view was that the Moon and the Earth formed of the same time as the Solar Nebula. Another was that the Moon split off the earth and yet another view was that the Moon formed somewhere else and was later captured by the earth's gravitational force.

With scientific instruments and equipment getting more and more sophisticated and with the development of space vehicles of immense capability, the scope of exploring and studying the Moon grew intense by leaps and bounds. The space explorer's prime target prior to the planets distinct advantage of being used as a platform and potential base for "Further exploration of the solar system and beyond". Thus began the race to go to the Moon and to send machines and men to orbit and land on the lunar surface and bring back its pictures and rock samples.

### Salim Ali

#### One of the world's leading Ornithologist

The Indian Birdman, Dr. Salim Mozuddin Abdul Ali took innate interest in exploring a vast treasure of captivating birds.

The legendary writer was born on 12th November 1896 in Bombay. He went to Berlin to study ornithology. He travelled all over the country on his bird watching surveys.

The thrills of bird watching in class X English text is in a sweet way which pricks our ears in sheer wonder.

The Indian Government honoured him by nominating him as a member of the Rajya Sabha in 1976, he was honoured with the padma vibhushan. The same year, he won the J. Paul Getty wildlife conservation prize. He has narrated his life with birds, in his autobiography, "Fall of a sparrow" which refresh the budding ornithologists and their perspective towards this growing field as a whole.

His immense contribution was initiated with just an inexpensive pair of binoculars, a notebook, a pencil and an ample stock of patience and dedication. The marathon left us in the year 1987 echoing bird watching as a pleasure filled activity.

**LIFE**

What is life ?  
 Is it simply the game of the birth and death.  
 Countless people live and die  
 Life is a struggle towards the success  
 And to achieve this success  
 People face so many hurdles through the stages of life. And after getting success they sleep, leaving behind footprints which are full of enlightenment  
 And this is what our forefathers have left for us for our future generations.

**MATRICKS**

If you want to multiply a number with 5 add one zero to it & divide by 2.  
 Ex : 15625 x 5 = 156250 / 2  
 78215 = 78215  
 Both are equal

If you want to multiply a number with 9 add one zero to it & subtracts the same number.  
 Ex : 25 x 9 = 250 - 25  
 225 = 225  
 Both are equal

## WHAT IS SUCCESS ?

If you really want to succeed, from the habit of doing things that failures don't like to do  
You need to keep your mind on what you want not on what you don't want. Success is not an accident. It is the result of your attitude and your attitude is a choice. Hence success is a matter of choice and not chance.
